

Support access to health care?

Protect conscience rights.

Catholic Organizations Respond to HHS "Preventive Services" Mandate

We, the undersigned, strongly support access to life-affirming health care for all, and the ability of secular and religious groups and individuals to provide and receive such care. That is why we have raised objections to a rule issued by the U.S. Department of Health and Human Services forcing almost all private health plans to cover sterilization procedures and contraceptive drugs, including drugs that may cause an early abortion.

As written, the rule will force Catholic organizations that play a vital role in providing health care and other needed services either to violate their conscience or severely curtail those services. This would harm both religious freedom and access to health care.

The HHS mandate puts many faith-based organizations and individuals in an untenable position. But it also harms society as a whole by undermining a long American tradition of respect for religious liberty and freedom of conscience. In a pluralistic society, our health care system should respect the religious and ethical convictions of all. We ask Congress, the Administration, and our fellow Americans to acknowledge this truth and work with us to reform the law accordingly.
